### BOTOX® Cosmetic (onabotulinumtoxinA) IMPORTANT INFORMATION

**Indication**

BOTOX® Cosmetic is a prescription medicine that is injected into muscles and used to improve the look of moderate to severe frown lines between the eyebrows (glabellar lines) in people 18 to 65 years of age for a short period of time (temporary).

**IMPORTANT SAFETY INFORMATION**

**BOTOX® Cosmetic may cause serious side effects that can be life threatening. Call your doctor or get medical help right away if you have any of these problems any time (hours to weeks) after injection of BOTOX® Cosmetic:**

- **Problems swallowing, speaking, or breathing**, due to weakening of associated muscles, can be severe and result in loss of life. You are at the highest risk if these problems are pre-existing before injection. Swallowing problems may last for several months
- **Spread of toxin effects.** The effect of botulinum toxin may affect areas away from the injection site and cause serious symptoms including: loss of strength and all-over muscle weakness, double vision, blurred vision and drooping eyelids, hoarseness or change or loss of voice (dysphonia), trouble saying words clearly (dysarthria), loss of bladder control, trouble breathing, trouble swallowing. **If this happens, do not drive a car, operate machinery, or do other dangerous activities**

**The dose of BOTOX® Cosmetic is not the same as, or comparable to, another botulinum toxin product.**

There has not been a confirmed serious case of spread of toxin effect when BOTOX® Cosmetic has been used at the recommended dose to treat frown lines.

**Serious and/or immediate allergic reactions have been reported.** They include: itching, rash, red itchy welts, wheezing, asthma symptoms, or dizziness or feeling faint. Tell your doctor or get medical help right away if you are wheezing or have asthma symptoms, or if you become dizzy or faint.

**Do not take BOTOX® Cosmetic if you:** are allergic to any of the ingredients in BOTOX® Cosmetic (see Medication Guide for ingredients); had an allergic reaction to any other botulinum toxin product such as *Myobloc®* (rimabotulinumtoxinB), *Dysport®* (abobotulinumtoxinA), or *Xeomin®* (incobotulinumtoxinA); have a skin infection at the planned injection site.

**Tell your doctor about all your muscle or nerve conditions**, such as amyotrophic lateral sclerosis (ALS or Lou Gehrig's disease), myasthenia gravis, or Lambert-Eaton syndrome, as you may be at increased risk of serious side effects including severe dysphagia (difficulty swallowing) and respiratory compromise (difficulty breathing) from typical doses of BOTOX® Cosmetic.

**Tell your doctor about all your medical conditions, including:** plans to have surgery; had surgery on your face; weakness of forehead muscles, such as trouble raising your eyebrows; drooping eyelids; any other abnormal facial change; are pregnant or plan to become pregnant (it is not known if BOTOX® Cosmetic can harm your unborn baby); are breast-feeding or plan to breast-feed (it is not known if BOTOX® Cosmetic passes into breast milk).

**Tell your doctor about all the medicines you take**, including prescription and nonprescription medicines, vitamins, and herbal products. Using BOTOX® Cosmetic with certain other medicines may cause serious side effects. **Do not start any new medicines until you have told your doctor that you have received BOTOX® Cosmetic in the past.**

**Please see additional Important Safety Information about BOTOX® Cosmetic on reverse side.**

### LATISSE® (bimatoprost ophthalmic solution) 0.03% IMPORTANT INFORMATION

**Indication**

LATISSE® is a prescription treatment for hypotrichosis (inadequate or not enough lashes) to grow eyelashes longer, fuller, darker.

**Important Safety Information**

If you use/used prescription products for eye pressure problems, use LATISSE® under doctor care. LATISSE® may cause increased brown pigmentation of the colored part of the eye which is likely permanent. Eyelid skin darkening may occur and may be reversible. Only apply at the base of upper lashes. **DO NOT APPLY** to lower lid. Hair may grow on skin that LATISSE® frequently touches. If you have eye problems/surgery, consult your doctor about use of LATISSE®. Common side effects are itchy and red eyes. If discontinued, lashes gradually return to previous appearance.

You are encouraged to report negative side effects of prescription drugs to the FDA. Visit [www.fda.gov/medwatch](http://www.fda.gov/medwatch) or call 1-800-FDA-1088.

**Full Prescribing Information has been provided to your doctor.**

**Please see Important Safety Information for JUVÉDERM® injectable gel on reverse side.**

**BOTOX® Cosmetic (onabotulinumtoxinA) IMPORTANT SAFETY INFORMATION (continued)**

Especially tell your doctor if you: have received any other botulinum toxin product in the last 4 months; have received injections of botulinum toxin, such as *Myobloc*®, *Dysport*®, or *Xeomin*® in the past (be sure your doctor knows exactly which product you received); have recently received an antibiotic by injection; take muscle relaxants; take an allergy or cold medicine; or take a sleep medicine.

**Other side effects of BOTOX® Cosmetic include:** dry mouth, discomfort or pain at the injection site, tiredness, headache, neck pain, and eye problems: double vision, blurred vision, decreased eyesight, drooping eyelids, swelling of your eyelids, and dry eyes.

For more information refer to the Medication Guide or talk with your doctor.

You are encouraged to report negative side effects of prescription drugs to the FDA. Visit [www.fda.gov/medwatch](http://www.fda.gov/medwatch) or call 1-800-FDA-1088.

**Full Product Information, including Boxed Warning and Medication Guide, has been provided to your doctor.**

**JUVÉDERM® XC IMPORTANT INFORMATION**

**Indication**

JUVÉDERM® injectable gel is injected into areas of facial tissue where moderate to severe facial wrinkles and folds occur to temporarily add volume to the skin, which may give the appearance of a smoother surface.

**IMPORTANT SAFETY INFORMATION**

Most side effects are mild or moderate in nature, and their duration is short lasting (7 days or less). The most common side effects include, but are not limited to, temporary injection-site reactions such as: redness, pain/tenderness, firmness, swelling, lumps/bumps, bruising, itching, and discoloration.

As with all skin-injection procedures, there is a risk of infection.

To report a problem with JUVÉDERM®, please call Allergan Product Surveillance at 1-800-624-4261.

**For more information, please see the About Safety page at [www.juvederm.com](http://www.juvederm.com) or call the Allergan Product Support line at 1-800-433-8871.**

JUVÉDERM® injectable gel is available by prescription only.
